PRE PREP PROGRAM

- Structured and engaging pre Prep programs to develop foundation skills in literacy and numeracy in a fun filled environment.
- Our programs focus both on school readiness and preparation for their formal years of learning. Each child is given the opportunity to develop and shine embracing their individual learning in an environment that is warm, inviting and nurturing.
- The Clarinda Primary School Prep teachers easily identify the students who have been part of our programs – they're independent, they understand school routines and they start their prep year having already developed a love for learning.
- Parents/guardians are required to sign their child in and out of the program. Each child is required to bring a clearly named drink bottle of water and a change of clothes in a small backpack.
